DASTARDLY DESERT DOINGS

With 600,000 Israelites running around the desert, you can imagine it'd be a tough job to find a bad guy. Well, someone's lifted Moses' prized frog collection (got 'em on sale on the way out of Egypt) and he's plenty mad. Fortunately, Detective Miriam bat Amram's on the case. Here are the statements she's collected.

"I saw him, all right," said the first witness. "A guy with a pencil mustache, and dark hair, and a thick scarf around his throat."

"I saw him too," said the second witness. "He had an ugly-looking scar, and big, bushy eyebrows behind thick glasses."

The third witness' account: "He pushed me aside as he made for the flap of the Tent of Meeting, so I saw him quite clearly. I'll agree he had a mustache, but he had thin eyebrows, and he wasn't wearing a scarf!"

The fourth witness: "I'll tell what the dude looked like. He had blonde hair, no glasses, and a scar on his left cheek."

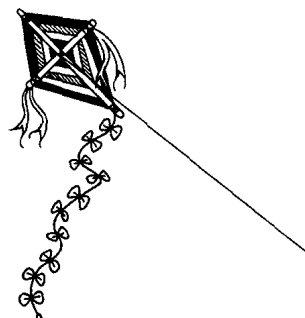

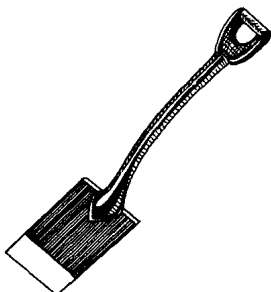

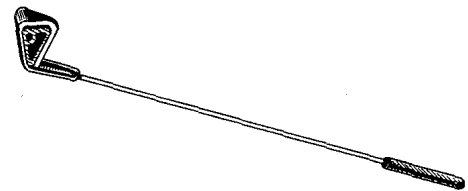

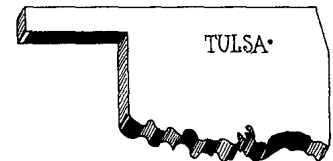

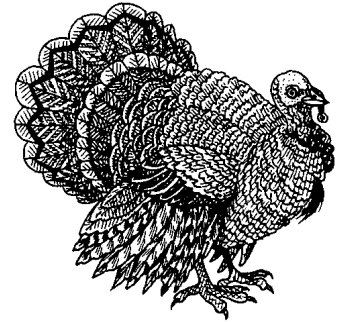

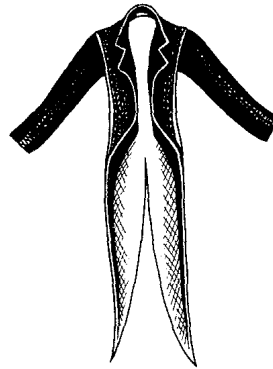

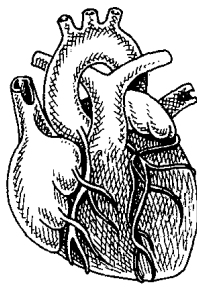

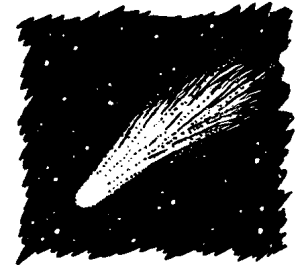

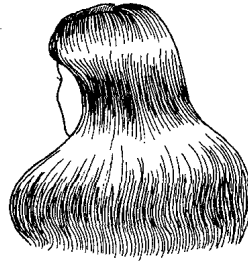

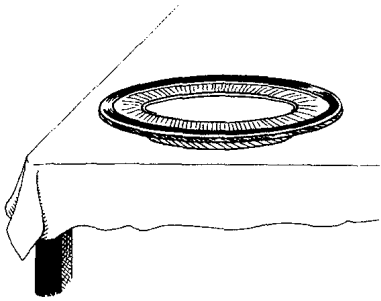

Detective Miriam accurately figured that none of the witnesses got it right. But only by one detail. With that in mind, she picked the culprit from the line-up below. Can you?

stay together. everybody!
600.000 people in 12 tribes!
That's a lot of people to

keep track of! The fifteen pictures below can be grouped in five "families" of 3 members, each containing some common element. can you keep your families together?

1. The Good Shepherd
2. My Red Brick Fence
3. Xanadu Farm
4. Robins New Clothes
5. The Chamber Boy's Tale
6. The Queen's Coat
7. War Against the Bagdad

AW, MA, DO I HAFTA GO TO SCHOOL?

After the Israelites finally made it into the Promised Land, they sent their kids off to school. Their teachers have distributed next semester's lists of "recommended reading" for 11th and 12th graders. Unfortunately, the printer misunderstood the instructions and printed the juniors' list on top of the seniors'. Since no one plans to read the books anyway, it probably doesn't matter. But for the record, can you identify the 15 titles on each list?

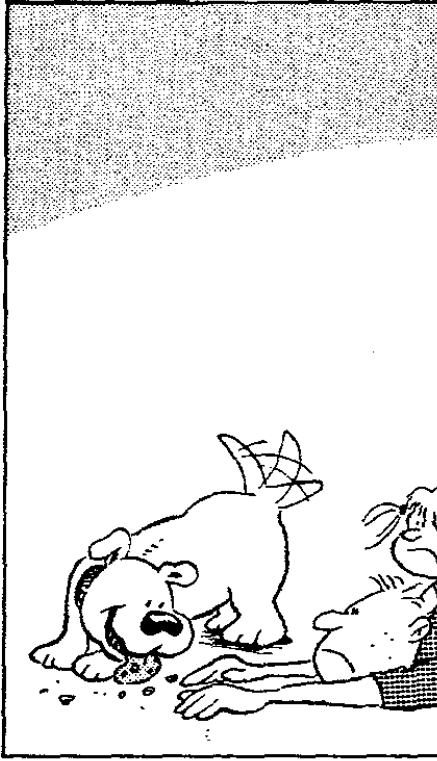

DON'T TOUCH THAT CHAMETZ!

Yeah, yeah, we know ... It can be tough to make it through Pesach without eating bread or cookies. This guy can't seem to make it either. Put the pictures in order to make the whole, sad story complete.

EYE EXAM

40 years in the desert, with angry armies plotting your destruction at every turn ... you'd better pay attention and be very observant. Here's a test the Israelite army might have given its officers. Carefully study the seven observation problems – solve as many as you can. Good luck!

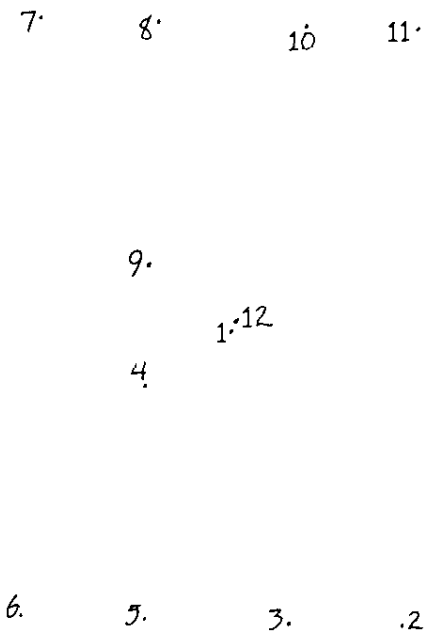

1. Which face is made up of the most common elements in the six pictures?

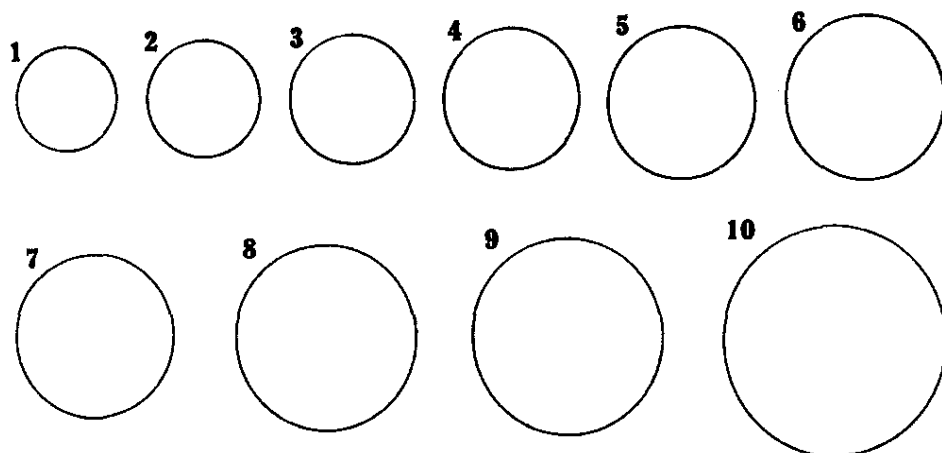

2. A five-pointed star is hidden in this design. Where?

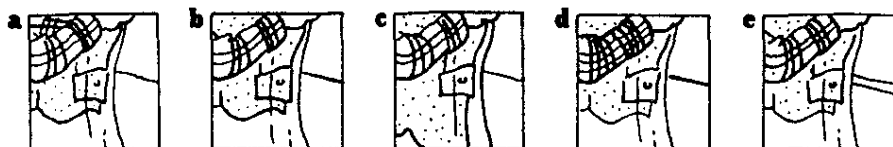

3. No pencil allowed on this one! What letter or number would be formed if you connected these dots?

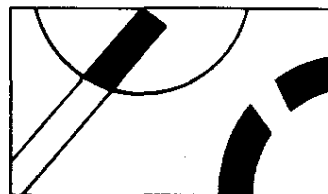

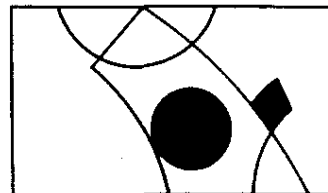

4. Which circles are the same size as
a) a dime, b) a penny, c) a quarter?

5. Which of the following pieces fits the empty square in the picture?

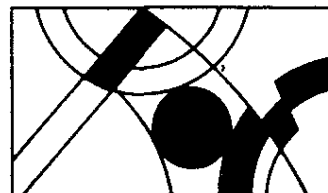

"Well, we got all the stains out, but we really think you should sit closer to the table when you eat."

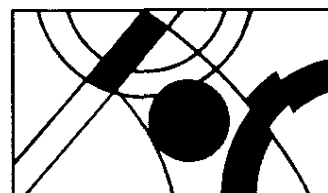

6. If the above two glass plates were superimposed on each other, which of the following designs would result?

7. How many perfect circles appear on these two pages? (You can ignore periods, dots, and letter o's.)

IT CAN BE SO DIFFICULT TO MAKE YOUR OWN GEFILTE FISH FOR PESACH. NO WONDER SO MANY PEOPLE JUST BUY IT IN THE STORE. LOOK AT HOW MUCH WORK THIS GUY HAD TO DO JUST TO FIND A NEIGHBOR WHOSE PET FISH HE COULD STEAL, BEAT SENSELESS, AND CHOP UP INTO LITTLE PIECES FOR HORS D'OEUVRES! DO YOU MIND HELPING HIM OUT?

There are 5 houses in 5 different colors. In each house lives a person of a different nationality. The 5 owners drink a certain type of beverage, smoke a certain brand of cigar, and keep a certain pet. Using the clues below can you determine who owns the fish?

The Brit lives in a red house.

The Swede keeps dogs as pets.

The Dane drinks tea.

The green house is on the left of the white house.

The green house owner drinks coffee.

The person who smokes Pall Mall rears birds.

The owner of the yellow house smokes Dunhill.

The man living in the house right in the middle drinks milk.

The Norwegian lives in the first house.

The man who smokes Blend lives next door to the one who keeps cats.

The man who keeps horses lives next door to the man who smokes Dunhill.

The owner who smokes Blue Master drinks beer.

The German smokes Prince.

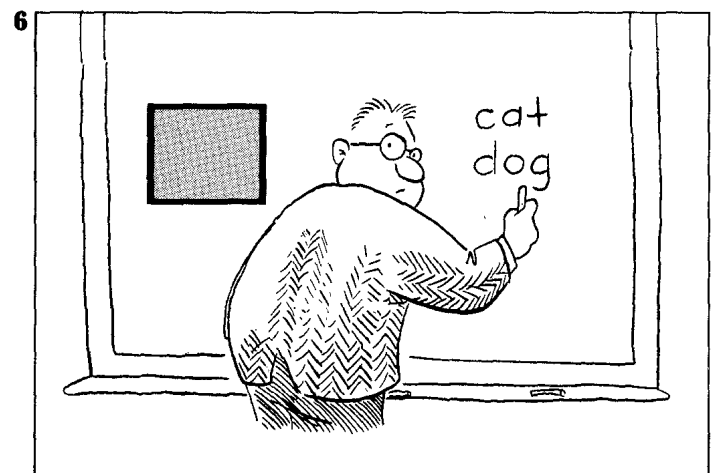

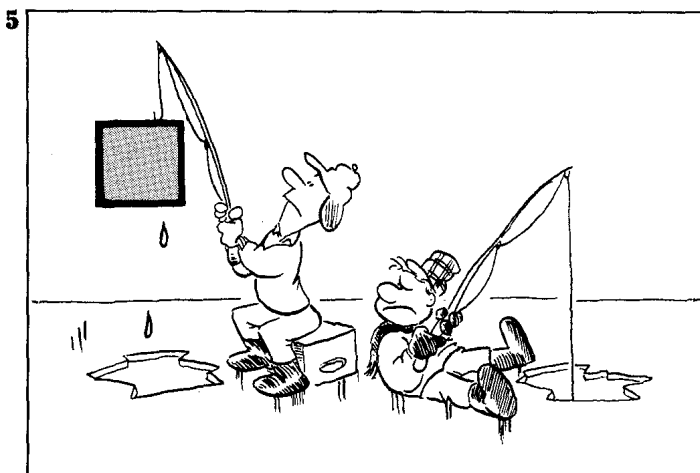

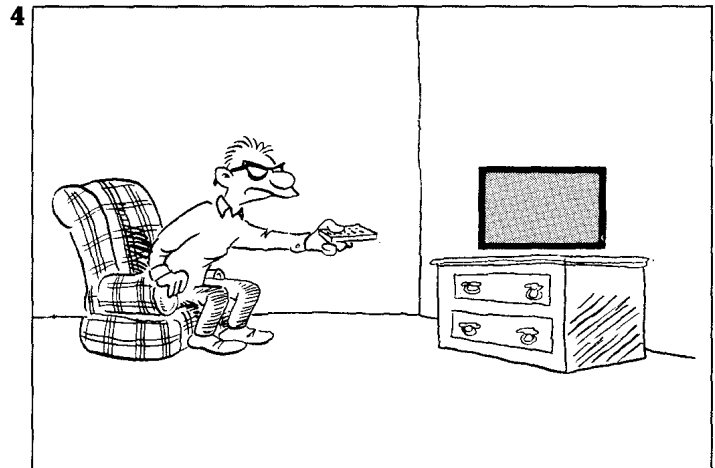

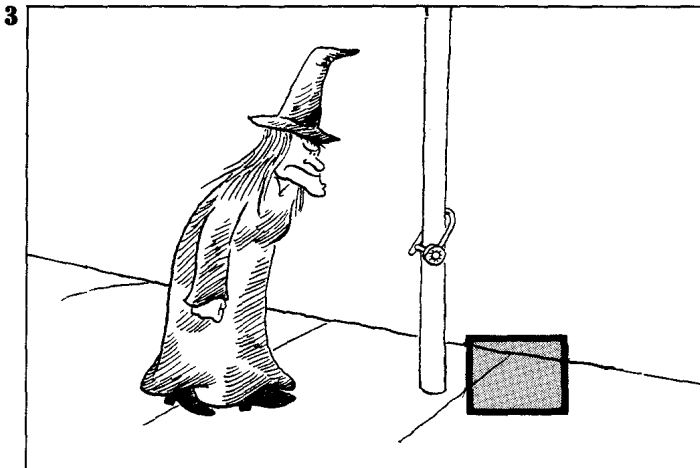

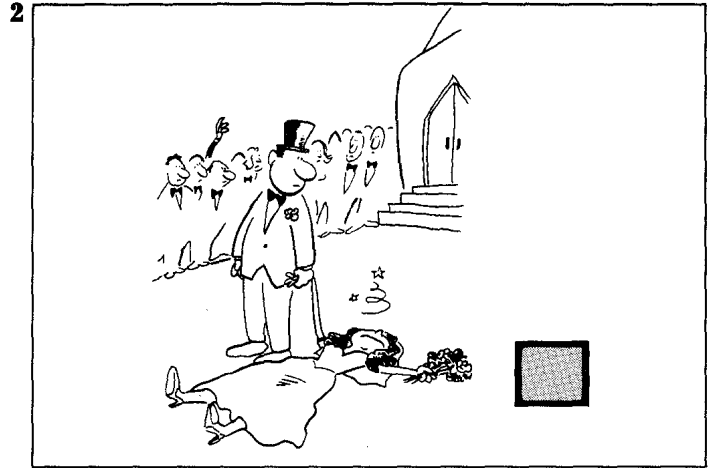

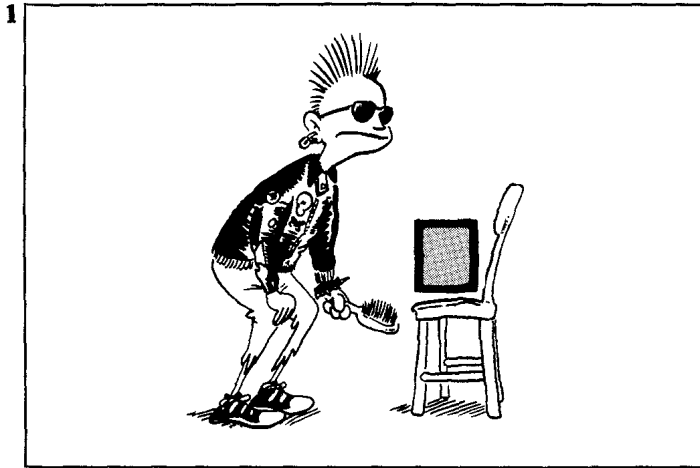

The Norwegian lives next to the blue house.

The man who smokes Blend has a neighbor who drinks water.

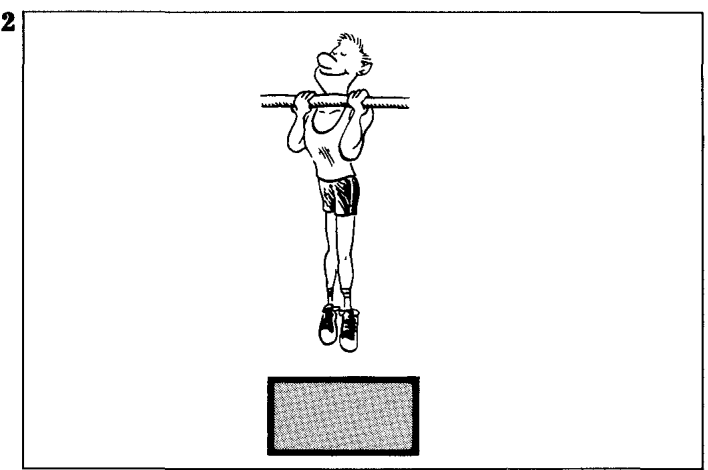

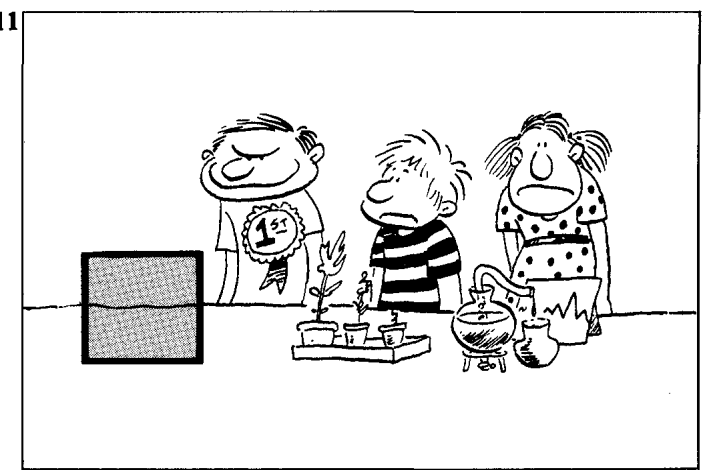

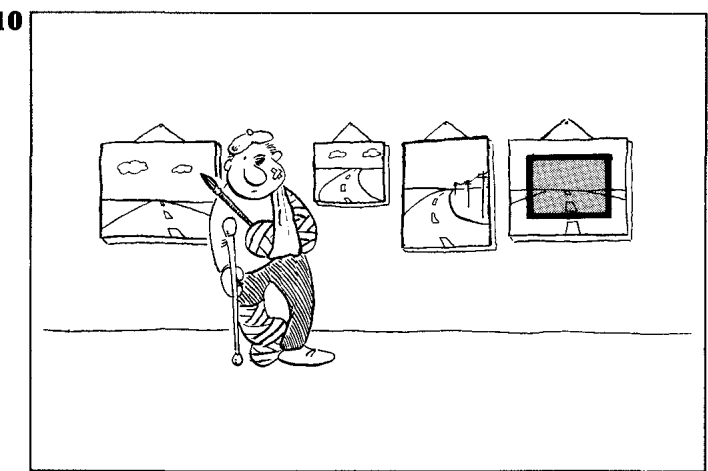

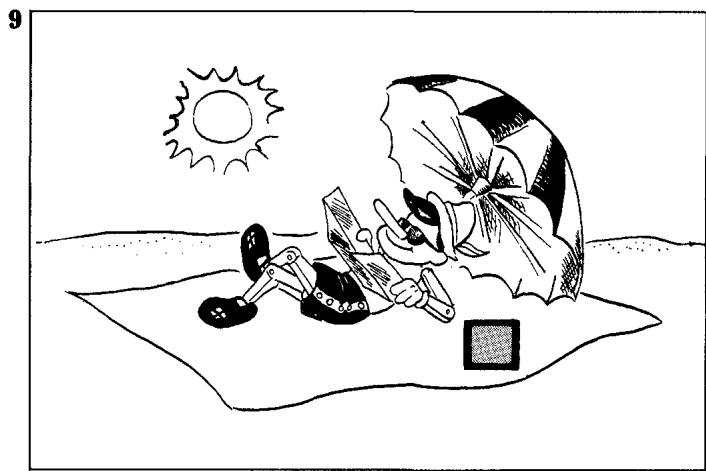

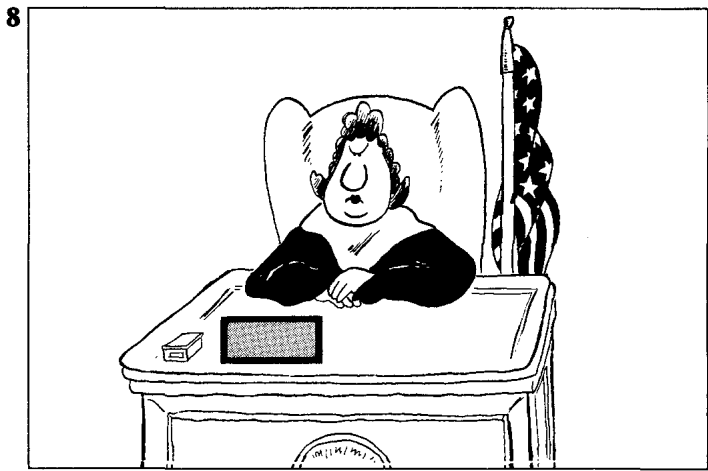

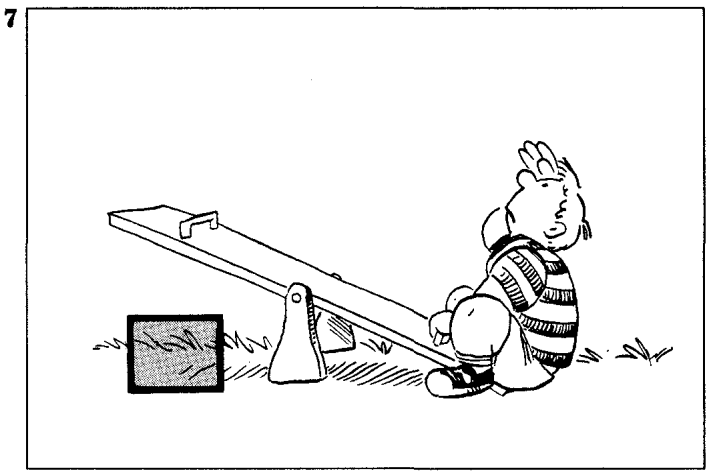

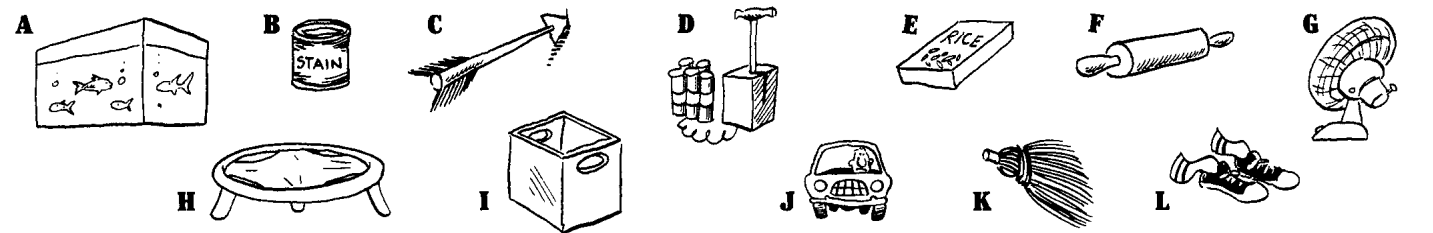

HUMOR STOP

Forty years is a lot of time in the desert. Let's hope they took the time to crack a joke or 600,000. Of course, no joke is very funny if you don't get

the punchline right. Here are 12 cartoon gags, with the part that makes them funny ... missing. The squares mark roughly where the missing funny-bone belongs. Can you match items A-L (on the next page) into drawings 1-12?

Moses' Mad Moods

Could you do any better? The poor guy (Moses, of course) had to lead 600,000 complaining Israelites all around the desert. No wonder he lost his patience a few times! Well, here's your chance to see how you think under pressure. Just read and answer the following questions.

On your mark, get set, relax!

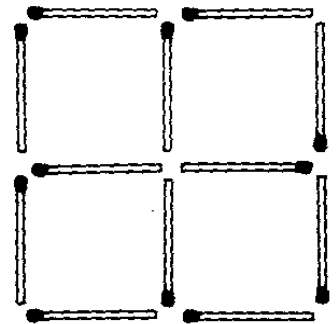

Draw a line under the third H within this sentence. Then write the numbers 5 through 1 in backward order here _____

_____. Now strike out every baseball term in this sentence, unless a bat is a type of fowl. Circle the word that doesn't belong: China, Peru, India, Africa, Luxembourg. Cross out four matches in diagram "A" at right so as to leave only two squares, unless there would be eight matches left, in which case cross out four matches so as to leave only one square. If cows don't give milk, write BULL in this space _____. Draw a wavy line under the fraction that is not equal to one half: $2/4$, $3/6$, $8/18$, $17/34$, $67/134$. Now name four states that border Canada. _____

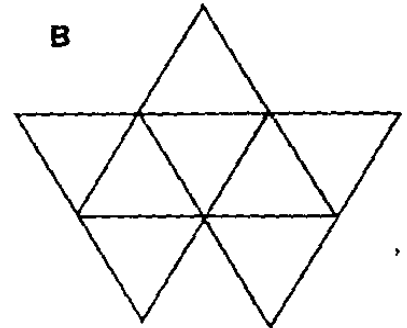

_____. Ignore every third word in the following instruction: If horses spiders have four seven legs, do not draw a triangle circle in around this square: \square . How many equilateral triangles (of any size) are in diagram "B" at right? _____ Circle the word that's out of alphabetical order: forceps, foreign, forestry, forehand, formality, foster—Hold it! If four fours are less than fourteen, then cross out the shortest word instead. Speaking of fours, how many eights go into four times four times four? _____ If there are not 52 cards in a poker hand, cross out all pairs in the card layout ("C") at right. Write ACE here _____, unless jacks are higher than kings. If two tens make a score, circle every card to the left of a crossed-out spade. If pigs have feathers or the White House has wings, follow the next instruction incorrectly: Misspell MISSPELL in the blank _____. Hw mny vwls hv bn rmvd frm ths sntnc? _____ If John gives Mary one half as many kisses as he gives Sue, and gives Sue three more kisses than he gives Mary, how many kisses does Sue get? _____ The piece of paper ("D") at right is divided into 16 sections. Imagine laying the paper on a table. Fold the paper in half by bringing the bottom edge up to the top; in half again by bringing the right edge over to the left; again by bringing the left over to the right; and once more, bringing the bottom edge up. Which numbered section is now on top? _____ Name four countries that end in Y. _____

_____. Ignore the next two sentences, unless water burns or a flute is a percussion instrument. But be sure to obey the next sentence. Write the number of half dozens in two gross here _____. If apples have seeds, write CORE in the right margin, unless oranges are not orange or grapefruit is a melon, in which case write RIND instead, but if watermelons don't grow underground write WRECKED as well. Read aloud what you've written in the margin, and you're finished!

A Non-Violent Whupping

Perhaps if Moses had beaten the taskmaster at *this* game, it would have been a whole different story. Anyway, the answer to each of the 20 questions at the bottom of this page is one of the 24 words below. Each answer scores a “hit” (which you should cross off once you’ve used it). Four words will remain unused when you’re done, which can be rearranged to reveal a quotation by chess grandmaster Savielly Tartakower that is definitely *not* the message of Passover.

WHICH WORD ...

- contains only the letters in the word TARGET?
- spells the name of a brand of beer in reverse?
- would spell a synonym of itself if you dropped its first and fifth letters?
- sounds like two consecutive arithmetical operations?
- would have the same pattern as ADELAIDE in a cryptogram?
- would spell the name of a movie if you dropped its middle letter?
- has, when written in lower-case script, strokes below the line in all but one of its letters?
- is an anagram of a compass direction?
- would sound like a word meaning “trustworthy” if spoken with a lisp?
- would be pronounced the same if you dropped its last four letters?
- contains all five vowels in reverse order?
- is a verb whose present and past tense forms are spelled the same?
- would become a word meaning “trade” if you removed its end?
- consists of two consecutive words meaning “a legal matter”?
- would become an antonym of itself if the letters FE were placed in front of it?
- contains Roman numerals totaling 2,512?
- means, to a punster, “The purpose of attending a Boston flea market”?
- can be prefixed by any of 10 different letters to form a common new word?
- would spell itself backward if you reversed its middle two letters?
- begins with a letter that appears in each of the other remaining four words?

DESACH PRODUCE

THE PHYSICS OF CROSSING THE RED SEA

Of course, it was impossible! But some people actually try to figure out how the waters of the Red Sea might actually have split. Well, we can't answer that question, but you might be able to figure a few other things out in the questions below. Good luck!

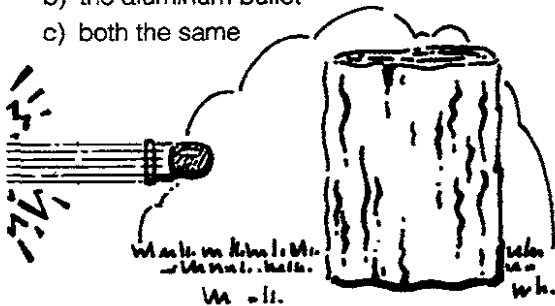

1. MAGNET CAR Will hanging a magnet in front of an iron car, as shown, make the car go?

- a) yes, it will go
- b) it will move if there is no friction
- c) it will not go

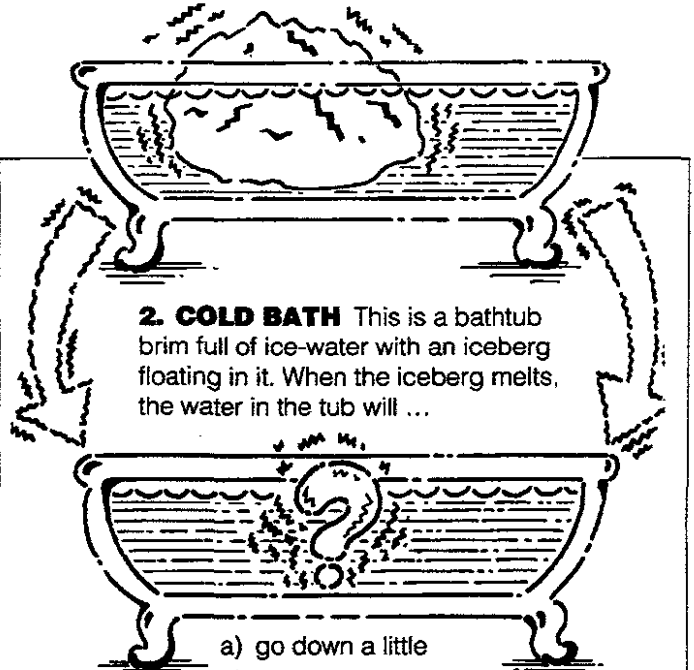

3. RUBBER BULLET A rubber bullet and aluminum bullet both have the same size, speed, and weight. They are fired at a block of wood. Which is more likely to knock the block over?

- a) the rubber bullet
- b) the aluminum bullet
- c) both the same

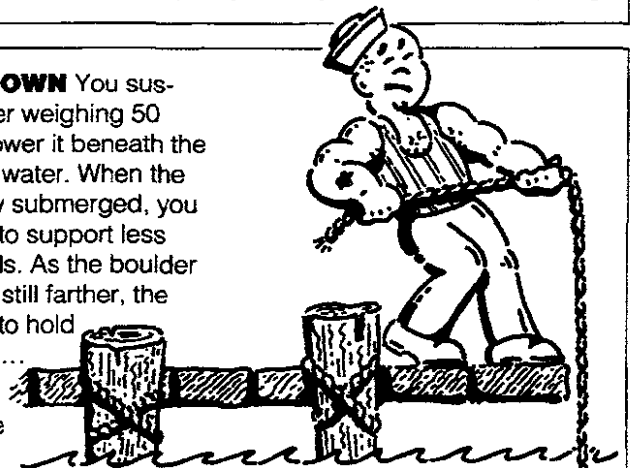

2. COLD BATH This is a bathtub brim full of ice-water with an iceberg floating in it. When the iceberg melts, the water in the tub will ...

- a) go down a little
- b) spill over
- c) stay exactly brim full without spilling

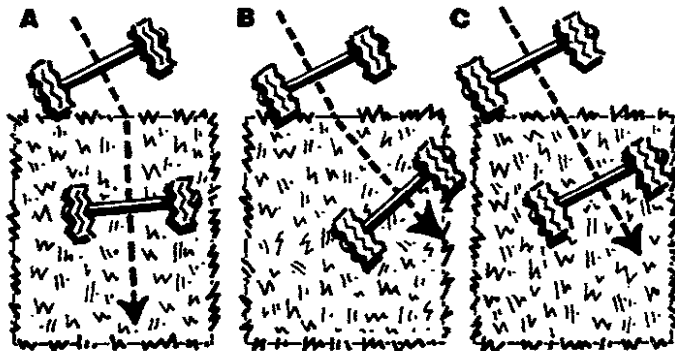

4. GOING DOWN You suspend a boulder weighing 50 pounds and lower it beneath the surface of the water. When the boulder is fully submerged, you find you have to support less than 50 pounds. As the boulder is submerged still farther, the force needed to hold the boulder is ...

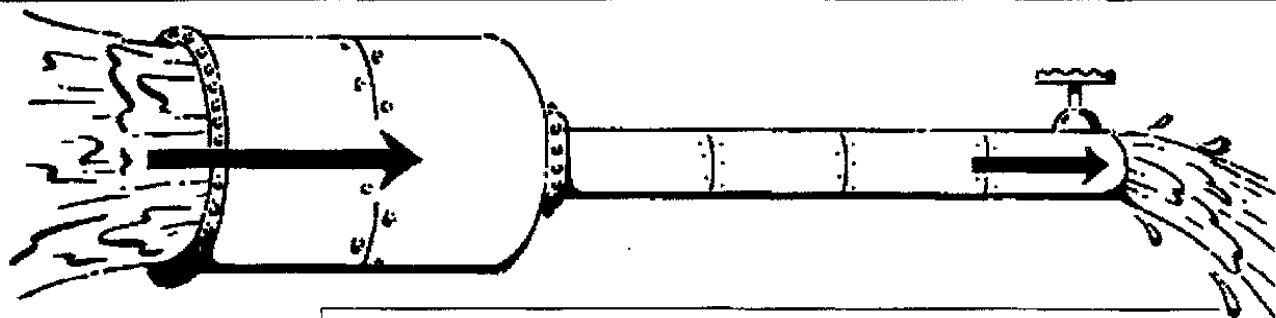

- a) less
- b) the same
- c) more

5. TURNING CART WHEELS

Suppose a pair of toy cart wheels connected by an axle is rolled along a smooth sidewalk and onto a grass lawn. Due to the interaction of the wheels with the grass, they roll slower there than on the smooth sidewalk. When the wheels are rolled at an angle onto the lawn, which of the paths at right will they take?

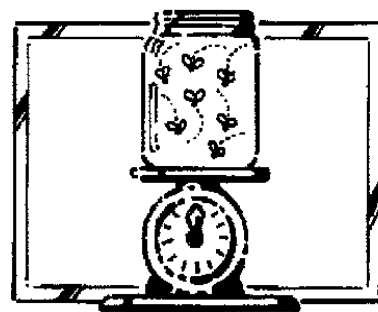

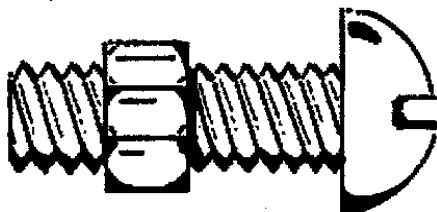

6. BOTTLENECK Ten gallons of water per minute is flowing through this pipe. Which of the following is correct? The water goes ...

- a) fastest in the wide part of the pipe
- b) fastest in the narrow part
- c) at the same speed in both parts

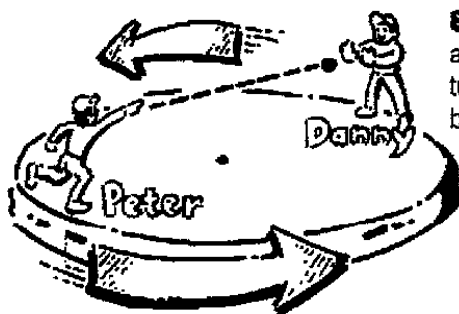

7. TOUGH NUT A nut is very tight on a screw. Which of the following is most likely to free it?

- a) cooling it
- b) heating it
- c) either
- d) neither

9. JAR OF FLIES A bunch of flies are in a capped jar. You place the jar on a scale. The scale will register the most weight when the flies are ...

- a) sitting on the bottom of the jar
- b) flying around inside the jar
- c) neither; the weight of the jar is exactly the same in both cases

8. CAROUSEL Peter and Danny are standing on a carousel which is turning as illustrated. Peter throws a ball directly toward Danny. The ball ...

- a) gets to Danny
- b) from Peter's standpoint goes to the right of Danny
- c) from Peter's standpoint goes to the left of Danny

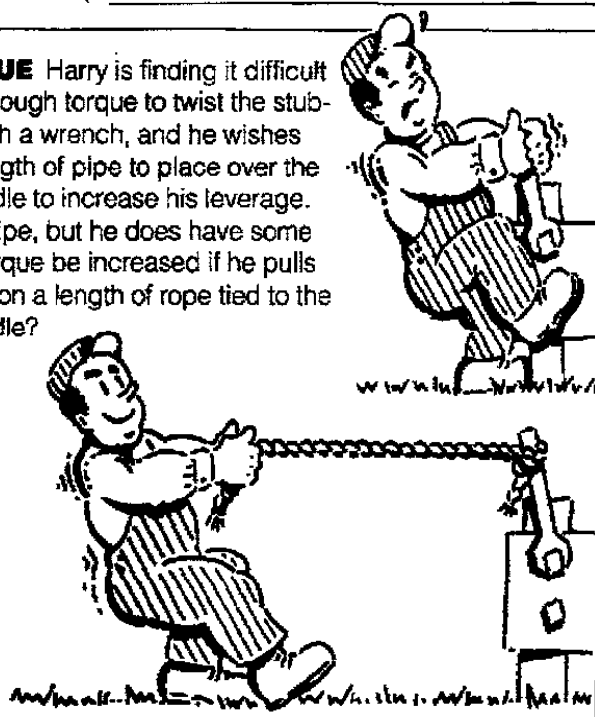

10. CREAM IT Suppose you are served coffee at a restaurant and want it to be hot when you are ready to drink it a few minutes later. You should add the room-temperature cream to it ...

- a) right away
- b) when you're ready to drink it
- c) either—the effect will be the same

11. TORQUE Harry is finding it difficult to muster enough torque to twist the stubborn bolt with a wrench, and he wishes he had a length of pipe to place over the wrench handle to increase his leverage. He has no pipe, but he does have some rope. Will torque be increased if he pulls just as hard on a length of rope tied to the wrench handle?

- a) yes
- b) no

Perhaps if Moses had “plagued” Pharaoh with these TEN, he’d have had a chance. Perhaps not. But you can “plague” yourself, if you like. Go on, hot shot; burn off some brain cells!

1. What sentence is concealed below?

IOEAESMGVL

2. My last three letters are hard & cold. Remove my first two letters, & you have a word meaning 'minutely accurate.' I am a city. What am I?

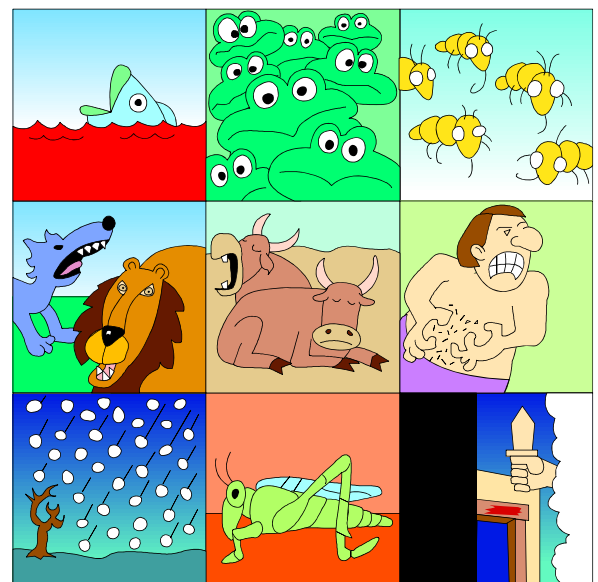

3. Determine what this sentence says, given only the initial letters of some of the words: A W that E W.

4. Which one of the statements that follow is definitely false?

- A. I have fired 100 missiles at your country.
- B. Half of the people will be killed by explosions.
- C. There is a 90% chance that you will die.
- D. Most of the buildings will be destroyed.
- E. My missiles use biological agents.
- F. I'm a lover, not a fighter.

5. What famous theatric quotation does this series of letters conceal?

OERTOETSEN

6. In a perfectly circular arena, I walk from the edge directly to the center. I then turn directly to my left, & walk in a straight line to the edge of the arena. I then turn to the right & follow along the edge for a total of 500 meters until I arrive at the point that I started from. What is the circumference of the inner edge of the arena?

Each of the following problems consists of three words or names that have some indirect relationship to one another. The words are followed by a listing of the number of words and letters in the answer to the puzzle.

Example: Eve Doctor Juice (1 word, 5 letters) The answer is APPLE. Eve purportedly ate an apple in the Garden of Eden, there is a well known saying that "an apple a day keeps the doctor away," & juice refers to apple juice.

7. Tiger Cut Sword (1 word, 5 letters)

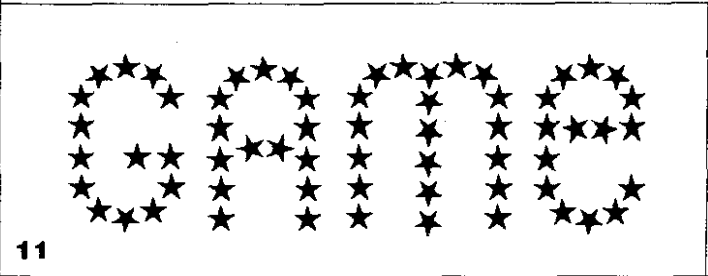

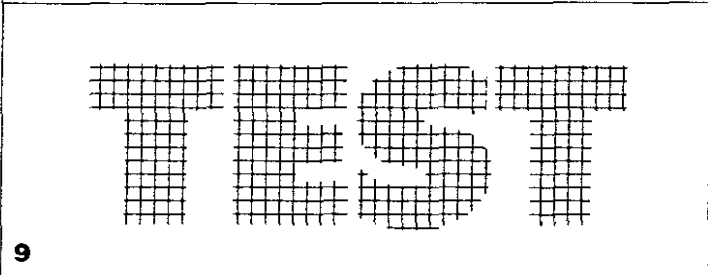

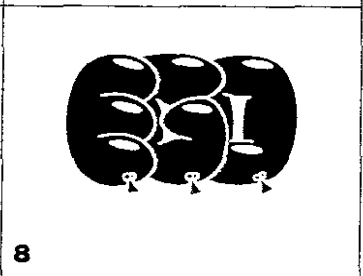

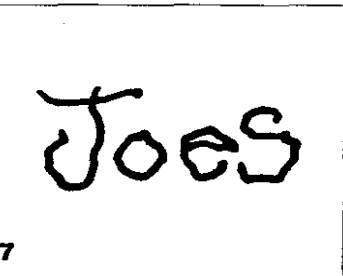

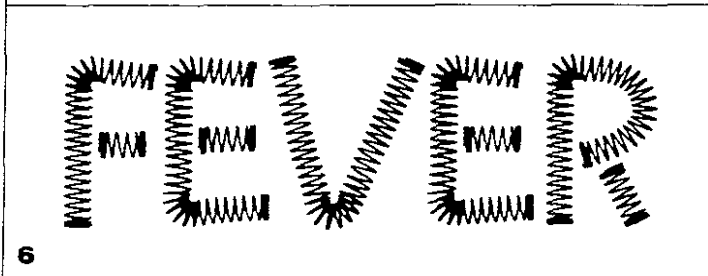

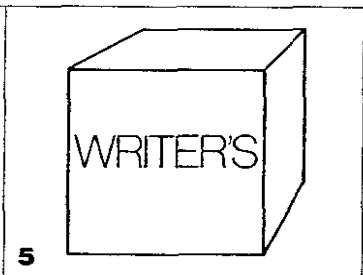

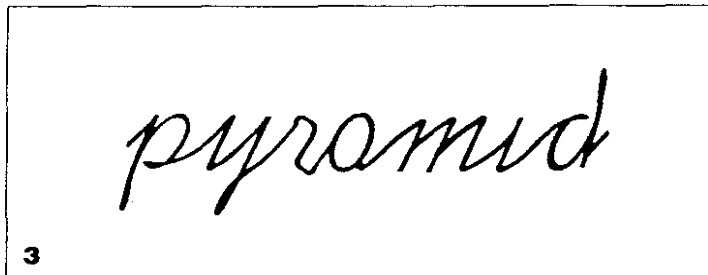

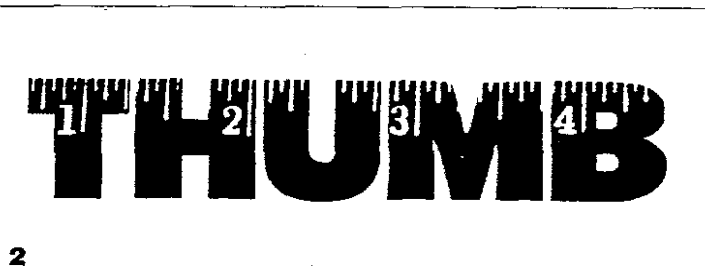

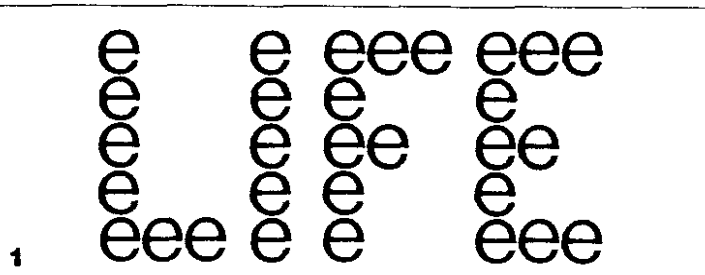

8. Snake Cleese Nude (2 words, 5 & 6 letters)

9. Nine Hammer Music (3 words, 4, 4, & 5 letters)

10. Burger Milk Smile (1 word, 6 letters)

SAY SOMETHING I CAN UNDERSTAND!

You know, the Israelites spent an awful lot of time down there in the land of Egypt. And you'd think that four hundred years would be enough time to learn the language. But hieroglyphics can be v-e-r-y challenging. When we left Egypt, among the things we brought out was this little game. Can you figure out just what each of these familiar sayings is saying? It won't be easy. And you may need a friend to help you out. So get to it! And good luck!

Baseball in Egypt? *That's what some people are saying. Given the information below, can you name the softball game's home team, the number of runs scored in each of the two teams' turns at bat, and the final score of the game?*

A PUZZLING SOFTBALL MATCH

PROTEUS (Galax. News Service), June 29, 2056—Softball games on Proteus, the lone planet in the Altair system, are often peculiar affairs. The ball always travels well in Proteus's thin atmosphere, and this year's showdown between the Titans and the All-Stars was a typical slugfest—from the towering three-run homer by Sal Bates of the visiting team in the first inning to the awesome two-run clout by Ronnie Jackson that won the game for the home team in the bottom of the sixth.

A strange feature of this game was that each team put a different number of runs on the scoreboard in each of its six turns at bat, and that all of the numbers from 1 through 12 were used in this way. Also notable was that one team's runs were scored in the alphabetical order of the written-out numbers.

"You can always count on something weird happening in this ballpark," said All-Stars' outfielder Jackie Lopes. Lopes' third-inning two-run homer was a fluke in itself—a broken-bat pop that got caught in an updraft and hit the left-field foul pole on the fly. Talk about luck.

Titan starting pitcher Larry Speedwell was erratic, giving up twice as many runs in the fourth inning as he did in the first three innings combined. "I lost my concentration out there," admitted the veteran lefty.

The high-scoring affair was popular with the fans, who turned out some 10,000 strong to fill the seats of Proteus's quaint Bandbox Stadium. "It was exciting—such a close game," said one fan. "All that slug-ging, and the two teams were still separated by just one run after five innings!"

40 Years of Television Re-runs?

So what did the Hebrews do when they weren't traveling the desert dunes? No TV. No Gameboy. Maybe they played cards! Here's a game of Solitaire in progress (somewhere between the Red Sea and the 7-11 Truck Stop). Can you spot the 12 errors -- in the deck itself or in the playing of the game. Red suits printed in black do not, of course, count as errors.

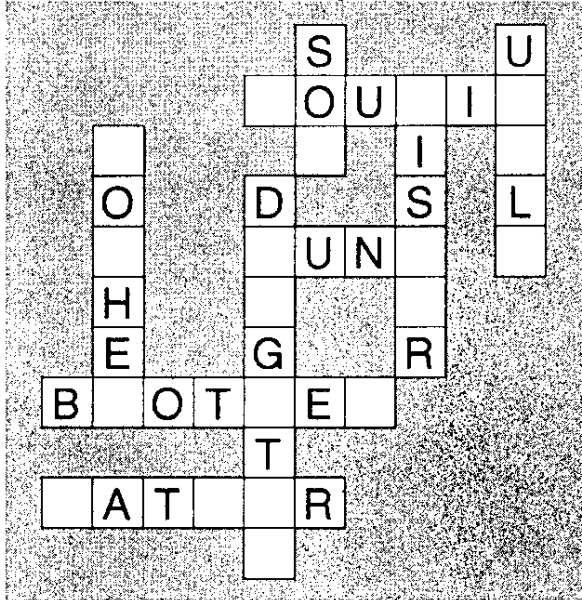

THEY HAD WHAT IN THE DESERT!?

Dolphin skins and mirrors ... it's amazing all the things the Israelites managed to bring with them on their desert journey. Find even more by completing each crossword grid with words that fit the given category.

WHO'S COMING TO SEDER?

You invited *how* many guests to our seder this year?!! Ten people I've never met before in my *life*?!! Now let me get this straight: You say that each person has a common first name which, when combined with his or her last name, forms a word that describes that person. For example, the heavy smoker is Nick O'Teen. Well okay, here goes ...

Ex. NICK O'Teen

TURNING IN CIRCLES

Stuck in the desert a while? Careful not to get turned around -- you could wind up turning in circles. This puzzle turns in two directions. The spiral's INWARD clues yield a sequence of words to be entered counterclockwise in the spaces from 1 to 100. The OUTWARD clues yield a different set of words to be entered clockwise from 100 back to 1. Fill in the answers, one letter per space, according to the numbers beside the clues. Make sure you know when to go back or forth, or you'll be going back and forth!

INWARD

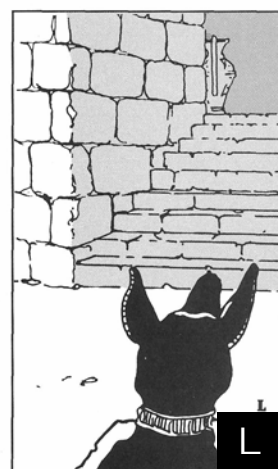

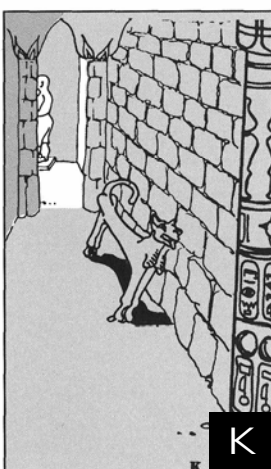

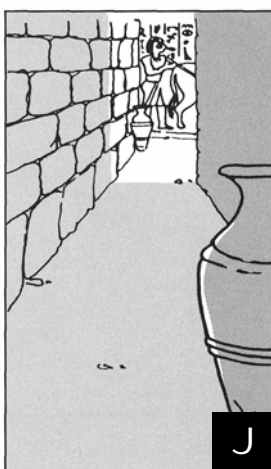

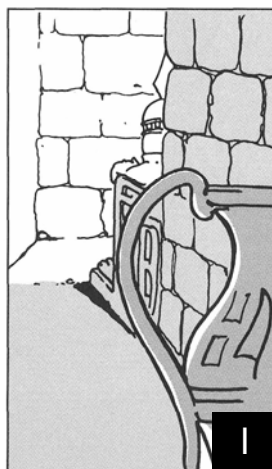

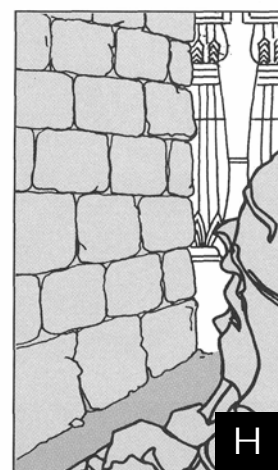

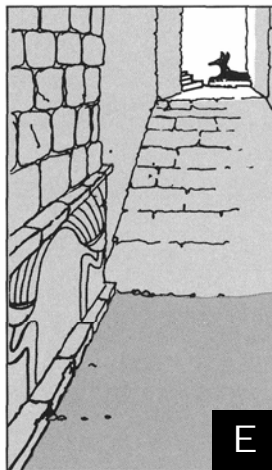

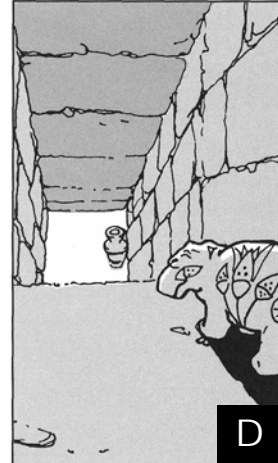

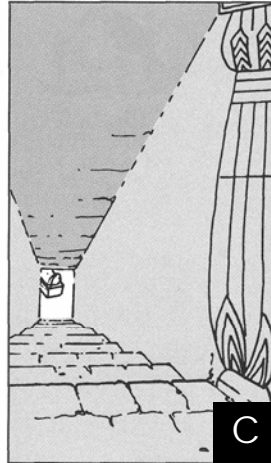

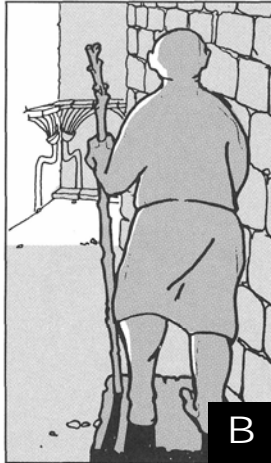

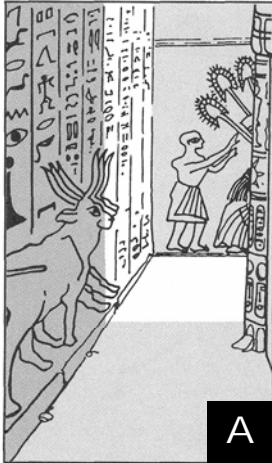

- 1-7 Shortstop or third baseman, e.g.
- 8-14 Dirty, run-down building
- 15-22 Hyatt competitor
- 23-27 Primitive calculators
- 28-34 What Ivan or Nicholas ruled over
- 35-41 Health setback
- 42-46 Perfectly clear
- 47-55 Sale item at the clothier
- 56-62 Voting "nay"
- 63-67 Artless
- 68-72 "She loves me, she loves me not" flower
- 73-78 Los ___, New Mexico
- 79-89 Surpassed in competition
- 90-94 Belly button
- 95-100 Atlantic City resort

OUTWARD

- 100-93 "Pro" or "nounce," in "pronounce"
- 92-85 Backup singer for Martha in '60s pop
- 84-77 Musical prodigy
- 76-69 Its capital is Kuala Lumpur
- 68-61 Nonconformists
- 60-54 Honeymooners' mecca
- 53-49 German-made pistol
- 48-40 Twits
- 39-33 Sicily's capital
- 32-26 Like emergency measures
- 25-18 Slaughterhouse
- 17-11 Fortification elevation
- 10-5 ___ and feathered
- 4-1 Explorer Ericson

No Pyramids!

Okay, let's go over this one more time. The pyramids were built nearly five hundred years before Jacob and his family moved into the Goshen View Apartments. The Hebrew slaves would have built the garrison cities of Pithom and Raamses (check out Exodus 1:11). No pyramids! But maybe they snooped around them a bit? Here's a set of photos we got on Snapfish but the digital files fell on the floor and need to be put back in order. Can you figure out the path from the entryway (G) to Pharaoh's chamber (F).

Telling Our Story

Hard as it may be to believe, we Jews haven't cornered the market on good storytelling. So pull up a piece of gefilte fish and a pencil, and trace the connections between these 12 classics. Fill in the boxes with the titles (10 novels, 1 play, 1 epic poem), one letter per box, the same letter in the box it's connected to. Careful: spaces in titles of two or more words have been removed. We've given you a few letters to get you going. Now get going! You haven't got 40 years!
